

## PROBLEMS FOR FINAL YEAR STUDENTS

(If they try to appear for offline examination)

- 1) Syllabus completed only 50% via offline classes that's why we can't write for complete syllabus.
- 2) Rest 50% portion is completed only for few combinations via online mode, lots of students were not able to grasp.
- 3) Since this Pandemic holiday started from March, many of students have migrated to their respective hometowns/villages.
- 4) Suppose if exams conducted, students need to travel from one place (district/state) to another place, and then they should also carry the risk of spreading the infection or getting infected by the virus.
- 5) If any one student get infected from this corona virus then he/she will be the responsible for spreading the infection to all students.
- 6) During this if any health issues/loss happens who is the responsible?
- 7) If at all syllabus completed via online classes. Then we demand online examination (MCQ).
- 8) Bcz, REVA UNIVERSITY (Autonomous) faCollege had successfully completed their final examination in this method and became successful. Now results are also out.
- 9) Now their students already recruited to jobs, they easily managed to finish their examination in a smartest way...
- 10) Mainly for us life sciences students we learn a lot things from laboratories, but we didn't even earned practical knowledge! How can we write examination without practice?
- 11) You may ask us Even SSLC students have wrote Exams, why we're not possible to write?

Answer- Their case is completely different, classes for their academic year got completed up to March. Instead they even got more time to explore themselves in examination.

12) At last we're NOT against examination but we're against Examination conducting based on online classes!

13) Where hostellers should stay? Exams will almost be conducted for a month.

Regards ~ GSC students.
